NASA Engineers Checking InSight's Weather Sensors

An electronics issue is suspected to be preventing the sensors from sharing their data about Mars weather with the spacecraft.

Description	Value
Equatorial Diameter:	6,792 km
Polar Diameter:	6,752 km
Mass:	6.39 × 10 ²³ kg (0.11 Earths)
Moons:	2 (Phobos & Deimos)
Orbit Distance:	227,943,824 km (1.38 AU)
Orbit Period:	687 days (1.9 years)
Surface Temperature:	-87 to -5 °C
First Record:	2nd millennium BC
Recorded By:	Egyptian astronomers

1. When the app runs for the first time (when DB doesn't have data), it will automatically scrape all the data.
2. When scraping is successfully done, an alert banner that you can close will appear on the top of the page.
3. The featured image scraped is located on the top of the page and have a button to scrape new data. The image is relative to web browser size.
4. The sizes of the Mars news, the Mars planet profile table and each hemisphere picture are relative to web browser size.
5. You can see the hemisphere pictures with full sizes when you click on them.
6. This web app is optimized for Chrome and has been tested only on Chrome.
